The Penn Pals: Right on Course

Oscar Miles, CGCS, overlooks the 6th hole at the Merit Club, Libertyville, Illinois.

PennLinks Greens. Penneagle Fairways. Pennncross Tees. The 'Penn Pals' Are Picture Perfect At The Merit Club.

Superintendent Oscar Miles, with Club President Ed Oldfield's affirmation, specified all the grassing of this Robert M. Lohmann designed club. With a clean canvas and open palette, Oscar began with PennLinks greens, Penneagle fairways and Pennncross tees, framing them with bluegrass/fine fescue/wildflower and prairiegrass roughs. You couldn't paint a more attractive picture.

Oscar chose PennLinks greens for its rapid establishment, marvelous root system, a crown and stolons that take topdressing, upright, grainless qualities and good, consistent color ... the best putting surface available.

He selected Pennncross for tees because they recover from divot scars more quickly.

And the Penneagle fairways? Oscar chose Penneagle for its upright growth, reduced thatch development, low nitrogen requirement and good drought and dollar spot resistance. He seeded at 80 lbs. per acre for immediate turf development and

erosion control. The fairways were playable in 8 weeks. Oscar's crew usually mows fairways in the evening and leaves the clippings; recycling nutrients while reducing removal and fertilizer costs.

Oscar articulates it best: "The unique coloring of the 'Penn Pals' contrasts beautifully with the grassing around them, defining the target areas. And with the dew on the bents early in the morning, they're a marvelous work of art."

We give trash no

Debris never falls where you want it. That's why it makes sense to have cleanup machines that can work anywhere. Machines like the John Deere 152 and 162 Vacuum Sweepers.

Both work equally well on turf or pavement because they don't have wear parts hitting the ground. They use vacuum power. A heavy-duty steel impeller is the key. It creates

tremendous suction and can handle everything from leaves and clippings to cans and bottles. Add the optional hand-held hose attachment and there's virtually no place

place to hide

left for trash to hide.

For your nearest distributor or free literature, call 1-800-544-2122, or write John Deere, Dept. 956, Moline, IL, 61265. We know you're going to like what you see.

AS WE SEE IT

TERRY McIVER, MANAGING EDITOR

Developing and promoting turfseed brands cuts costs

The latest National Turfgrass Evaluation Program examined some 72 varieties of bluegrass, 65 perennial ryegrasses, 93 fine fescues and 65 tall fescues.

But you, the buyer, might only need one of each.

Confused? You're not alone.

Even some within the seed industry think the great number of varieties makes it hard for the buyer to choose.

Sandra Winton of Zajac Performance Seeds wrote *LM* following publication of our annual Seed Pocket Guide in July.

"The proliferation of turfgrass varieties, and the multitude of data collected on those varieties has made the job of turf professionals progressively more difficult and confusing," she wrote. "Many varieties that were statistically indistinguishable from the No. 1 rated were never [even] mentioned in the guide."

In addition, Tom Stanley, director of marketing for Turf-Seed, reports some astronomical figures for brand promotion costs.

"Also, varieties have a short life span," says Stanley. "Too many varieties are causing confusion in the marketplace, and not many are significantly different."

"We all want to be listed on the first page of the turf trial reports," admits Stanley, "but what about the varieties on the second and third page? Are they significantly different? Most probably are not."

According to Stanley, Turf-Seed has decided to counter some of the confusion by promoting brands. "By promoting brands," says Stanley, we can take the disadvantages of promoting varieties and turn them into advantages." He also believes brands are "easily upgraded by using new breeding material that's coming through our research program, and it's easy to maintain exclusivity."

The University of Illinois' Dr. Hank Wilkinson, speaking at the Jacklin Discovery Tour, explained that more and

more seed companies are expanding their research to accelerate seed development, and to fill the growing void left by shrinking university research programs.

But research is costly and in some cases a hit-and-miss proposition, even for the most established company.

"You can do a lot of research and get nowhere," admits Wilkinson. "For me to generate one piece of new information can cost between \$30,000 and \$40,000," says Wilkinson. He described a figure as seemingly high as \$1 million as "a drop in the bucket" when considering the total capital needed to finance research. And even then, most investments don't see solid results for 10 to 20 years, even longer for disease research.

"Industry's going to have to pick up more of this role and cooperate with universities," said Wilkinson, "and you're going to see more people hired in at the private level to do this work."

If it doesn't necessarily develop new varieties, seed research can still, as Stanley suggests, improve within a brand itself. "Better quality, better traits, resistance, hardiness, green-up—if it won't produce good quality consistently, it's not of much value," admitted Wilkinson.

LANDSCAPE MANAGEMENT would like to continue being on the cutting edge of providing our readers with significant information about the seed industry. If you have any comments or suggestions as to how we can better serve you, please let us know.

LANDSCAPE MANAGEMENT

INCORPORATING LAWN CARE INDUSTRY

1993 Desk Companion

Control your weeds.

SCOTTS® pendimethalin preemergents provide tough, effective control of a broad spectrum of grassy and broadleaf weeds.

You can't find a better — or more cost-effective — control.

And there's a pendimethalin control for virtually every turfgrass application.

30-3-10 Fertilizer Plus Turf Weedgrass Control, with up to 8 times more particles per square inch than typical competitive physical blends, provides the ultimate preemergent weed control plus a controlled-release, methylene urea-based nitrogen feeding.

22-0-6 Turf Fertilizer Plus Preemergent Weed Control combines urea, sulfur-coated urea, and a potassium feeding with unsurpassed control of 6 grassy weeds and 9 broadleaf weeds before they sprout. Fine particles increase weed control efficiency over typical competitive physical blends.

14-0-14 Nitrogen/Potassium Fertilizer Plus Turf Weedgrass Control combines nutrient sources with pendimethalin for effective preemergent control of 6 annual grassy weeds and 7 broadleaf weeds.

Cut your costs.

Southern Weedgrass Control provides optimum utilization of pendimethalin necessary for season-long control on southern turfgrasses.

Turf Weedgrass Control provides unsurpassed preemergent weed control in both cool and warm season grass applications.

Weedgrass Control 60 WP offers liquid-applied pre-emergent control in both cool and warm season grass applications. It comes in convenient, easy-to-handle, water-soluble packets.

SCOTTS pendimethalin controls have been proven effective

and turf-safe for more than 6 years. Why risk your turf to anything less when you can count on these proven performers?

Your Scott Tech Rep is ready to help you select the formulation that's best for your course as part of a total turfgrass program. For more information, contact him today. Or call 1-800-543-0006.

There's no better way to control weeds, or your budget.

FROM COAST TO COAST, PENNINGTON IS THE BEST GRASS YOU EVER SEED.

Pennington is a national company with locations throughout the United States, so we understand that the grass that does well in Georgia won't survive a Minnesota winter. And the turf that's ideal for a fairway won't do at all for a green. Different circumstances call for different grasses. That's why we offer so many kinds and varieties. Each one is developed to meet specific conditions.

Perennial ryegrasses such as Pebble Beach, Sunrise 246, and Stallion are just a few of our top varieties that give outstanding performance for overseeding. For roughs we have proven performers such as Finelawn 5GL, Triad and Enviro turf type tall fescues, as well as our new cold tolerant turf type bermuda—Cheyenne.

With basic production in every major grass seed region in the country, Pennington can provide you with the correct grass seed for

any application and the dependable service that you need.

If so many different types of grasses leaves you uncertain about which one is best for your needs, just give us a call. Pennington has over forty years experience in the grass seed industry with a technical staff that can solve your toughest turf grass problems.

Meeting Dates through 1992

September

Sept. 8-10: Sports and Leisure World Trade Exhibition, East of England Showground, Peterboro, Eng. Contact: (+44) 908-312511.

Sept. 11-12: Southwest Horticultural Trade Show, Phoenix (Ariz.) Civic Plaza. Contact: (602) 966-1610.

Sept. 11-13: Florida Nursery & Allied Trades Show, Orange County Convention Center, Orlando. Contact: (407) 345-8137.

Sept. 15-16: California Turfgrass Research Conference and Field Day, Univ. Calif. at Riverside. Contact: (714) 787-3331.

Sept. 15-16: National Golf Course Owners Association seminar "Staying on Top," Myrtle Beach (S.C.) Martinique Resort & Conference Center. Contact: (800) 933-4262.

Sept. 15-18: Virginia Tech Turf and Landscape Field Days, Virginia Tech, Blacksburg. Contact: (703) 231-9736.

Sept. 18-19: AABGA Intermountain Regional Annual Conference, Albuquerque, N.M. Contact: (505) 768-3550 or (505) 982-8399.

Sept. 20-23: Florida Turfgrass Association conference and trade show, Prime F. Osborn Convention Center, Jacksonville. Contact: (800) 882-6712.

Sept. 20-23: Society of Municipal Arborists annual meeting and trade show, Ramkota Inn, Aberdeen, S.D. Contact: (605) 622-7015.

Sept. 20-25: "Basics of Arboriculture and Urban Forestry," Steinhart Lodge, Nebraska City, Neb. Contact: (402) 474-5655.

Sept. 21-24: Northwest Turfgrass Conference and Exhibition, Sunriver (Ore.) Resort and Lodge. Contact: (206) 754-0825.

Sept. 22-25: International Plant Propagators Society Western Region annual meeting, Radisson Hotel, Sacramento, Calif. Contact: (916) 922-2020.

Sept. 24-27: International Trade Fair for Horticulture, Frankfurt, Germany. Contact: (+49) 69-7575-6477.

Sept. 27-Oct. 2: "Advanced Urban Forestry: Creating Excellence," Steinhart Lodge, Nebraska City, Neb. Contact: (402) 474-5655.

Sept. 29: Target Specialty Products' annual fall seminar and exhibit, Harbortown Marina Resort, Ventura, Calif. Contact: (800) 352-3870.

Sept. 29-Oct. 1: Pacific Equipment & Technology Expo, Costa Mesa, Calif. Contact: (800) 525-7383.

Sept. 30-Oct. 2: International Society of Arboriculture Northwest Chapter annual meeting, Red Lion Inn, Lloyd Center, Portland, Ore. Contact: (503) 373-7854.

October

Oct. 1: Target Specialty Products' annual fall seminar and exhibit, San Diego (Calif.) Convention Center. Contact: (800) 237-5233.

Oct. 2: Landscape Ornamentals Research Field Day, Central Florida Research & Education Center, Sanford. Contact: (407) 323-2500, ext. 5559.

Oct. 5-7: Beginning in the Nursery Business, Virginia Tech, Blacksburg, Va. Contact: (703) 231-5445.

Oct. 6: Target Specialty Products' annual fall seminar and exhibit, Radisson Hotel, Sacramento, Calif. Contact: (800) 767-0719.

Oct. 7-8: Southern California Turfgrass Expo, Orange County Fairgrounds. Contact: (714) 951-8547.

Oct. 7-9: Southwest Turfgrass Association Annual Conference, Las Cruces (N.M.) Hilton. Contact: (505) 275-2576.

Oct. 8-10: American Society of Consulting Arborists annual meeting, Biltmore Estate, Asheville, N.C. Contact: (303) 466-2722.

Oct. 9: Target Specialty Products' annual fall seminar and exhibit, Red Lion Hotel, Ontario, Calif. Contact: (800) 352-3870.

Oct. 12-14: Production of Field Grown Nursery Stock, Virginia Tech, Blacksburg, Va. Contact: (703) 231-5445.

Oct. 19-20: Pacific Horticultural Trade Show, Los Angeles (Calif.) Convention Center. Contact: (916) 567-0200.

Oct. 21-23: Golf Summit, Marriott Orlando (Fla.) World Center. Contact: (407) 744-6006.

Oct. 21-24: Atlantic Seedsmen's Association Convention, Charleston, S.C. Contact: (814) 237-0330.

Oct. 22-23: Xeriscape '92, San Diego (Calif.) Convention Center. Contact: (619) 443-1756.

Oct. 22-24: International Society of Arboriculture Rocky Mountain Chapter annual meeting, Town House Inn, Great Falls, Mont. Contact: (406) 721-7275.

Oct. 23-25: New Jersey Tree Expo, Sheraton Poste Inn, Cherry Hill. Contact: (908) 246-3210.

Oct. 26-28: Production of Perennials and Annuals, Days Inn, Waynesboro, Va. Contact: (703) 231-5445.

Oct. 30-31: Texas Association of Landscape Contractors annual conference and exposition, Infomart/Loews Anatole Hotel, Dallas. Contact: (214) 241-1399.

Nov. - Dec.

Nov. 1: Southwest Outdoor Power Equipment Show, Arlington (Tex.) Convention Center. Contact: (512) 443-7999.

Nov. 1-4: International Irrigation Exposition, New Orleans, La. Contact: (703) 524-1200.

Nov. 1-5 or 11-15: New Tree Biology Seminars, Appalachian State University, Boone, N.C. Contact: (704) 262-3045.

Nov. 3: Florida Chapter, Sports Turf Managers Association meeting, Pompano Stadium. Contact: (305) 938-7477 or (305) 938-0217.

Nov. 8-10: Georgia Golf Course Superintendents Association annual meeting, King & Prince Hotel, St. Simons Island. Contact: (404) 769-4076.

Nov. 8-11: National Institute on Park and Grounds Management annual educational conference, Richmond, Va. Contact: (414) 733-2301.

Nov. 10-13: New York State Turfgrass Association conference and trade show, Rochester Riverside Convention Center. Contact: (518) 783-1229.

Nov. 15-17: Golf Range and Alternative Facilities Development Conference, Newport Beach (Calif.) Marriott Hotel. Contact: (407) 744-6006.

Nov. 15-19: Professional Grounds Management Society annual conference, Indiana Convention Center, Indianapolis. Contact: (410) 667-1833.

Nov. 15-19: Landscape and Grounds Maintenance Conference, Indiana Convention Center, Indianapolis. Contact: (703) 241-4004.

Nov. 16-19: Professional Lawn Care Association of America annual convention, Indiana Convention Center, Indianapolis. Contact: (404) 977-5222.

Nov. 16-19: Green Industry Expo, Indiana Convention Center, Indianapolis. Contact: (404) 973-2019.

Nov. 19-21: Tree Care Industry Expo '92, Baltimore (Md.) Convention Center. Contact: (800) 733-2622.

Nov. 30-Dec. 4: International Plant Propagators Society Eastern Region annual meeting, St. Louis (Mo.) Marriott Pavilion Downtown. Contact: (703) 231-5609.

Dec. 1-3: Agricultural Retailers Association Convention, Cincinnati (Ohio) Convention Center. Contact: (314) 256-4900.

It's not only your job.
You live and breathe it.

It could be something you realized a long time ago, when you were a kid looking out the classroom window wishing you were on the other side. Maybe it

was years later, when you couldn't wait for the weekend to come so you could get *out there*. Or maybe you just always knew. That, for you, forty hours a week stuck inside an office was no way to live.

So here you are, with a job that lets you be outdoors a good portion of every working day. And love for nature and the environment had a lot to do with it.

At DowElanco, we know those

Wasn't it love for nature that got you into this bu

feelings play a big role in the way you approach your job.

Of course you want beautiful turfgrass, but you want to protect the environment while

you're creating it.

So we're doing some things to help you out.

One example is the work we're doing to develop better product packaging. In fact, right

free training materials for your staff, and free equipment that will help you handle and use pesticides more safely.

And, most important, we're sharing information that can help

re and the environment siness in the first place?

now, we offer some of our products in water-soluble packets, and others in returnable containers.

We've also developed a research staff

you use pesticides more effectively, and in smaller amounts.

You'll find it in our free books on responsible pest management. We'd like to send you one. Return the coupon below, or call our toll-

free number. It's the first of

many steps you can take to protect the environment.

Are We Doing This Just To Be Nice?

We've just published three books on how to use pesticides more responsibly. The question is, why? Well, we believe it's in our best interests to look out for your best interests. By helping you create an effective, responsible pest management program, we'll make a customer instead of just a sale. When that happens, everybody wins.

that's entirely devoted to turf and ornamental projects. Their work is leading to concentrated products that require less volume and fewer applications.

Then there's our Responsibility Comes First program. It gives you the opportunity to receive

In the South, where weeds are a problem most of the year, you don't get much of a break from using herbi-

cides. So Southern turf stays strong and healthy.

And Surflan lasts up to a month longer than other herbicides. Just two or three applications gives you year-

round control of more than fifty weeds, including goosegrass, crabgrass and *Poa annua*. That can help you put less chemical into the environment.

Surflan is also very gentle on off-target plants. In fact, it can be

People use a herbicide. Mild usually

cide. So the milder your herbicide is to turfgrass, off-target plants and the environment, the better off you are.

That's why you should seriously consider Surflan® herbicide for your weed control program.

How To Keep Weeds From Sneaking Up On You.

University studies show crabgrass and goosegrass germinate when soil at 2" reaches the following temperatures for three consecutive days: loam 50-52°F, heavy wet clay 53-57°F, sand 49-51°F. Measuring soil temperature allows you to predict germination, and time your herbicide application for maximum control.

Soil Thermometer

Surflan is very mild on all warm season grasses. When used properly on established turf, university

sprayed over the top of delicate

ornamentals. So there's virtually no risk to nearby shrubbery, trees

Surflan stays where you put it. Even in heavy rainfall, it resists leaching into groundwater.

or flowers. Surflan is available as a sprayable and on fertilizer. If you prefer a granular form, there's XL* herbicide (it contains the same active ingredient

as Surflan).

You can put it down at the full rate, or use split applications to spread the load over the season. Either way, you'll get good results.

lot of words to describe isn't one of them.

Our 44-page book, The Turf Manager's Guide To Responsible Pest Management can

tell you more. It contains comprehensive "how to" information you can use to control weeds more efficiently. It also gives you step-by-step tactics you can use to control

If applying herbicide is something you'd like to do less often, we have good news for you. We can show you how to make fewer herbicide applications and get weed

grass. And it's available on fertilizer or in a granular form for accurate application.

Of course, a herbicide that lasts all season won't

Pest Management can tell you more. It contains information you can use to control weeds, insects and turf diseases more efficiently. For a free

Gallery-24 weeks

Team-20 weeks

Balan-10 weeks

Choose the length of control best for you.

The herbicides not applying herbicides

control that's as good or better than you're getting now.

Let's start with broadleaf weeds. It usually takes up to five herbicide applications a season to control them. But by using Gallery* herbicide (straight or on fertilizer), you can do it with one. It doesn't take much, either. Just 1/3 ounce per 1000 square feet.

A Story Straight From Crooked Stick.

By switching to Gallery the superintendent at Crooked Stick Golf Club in Carmel, Indiana, reduced herbicide applications on his fairways from five a year to one. The notoriously picky PGA officials who inspected those fairways for the 1991 PGA Championship raved

about their outstanding condition.

Okay, now for grassy weeds. A single application of Team* herbicide gives you sixteen weeks of broad-spectrum control. It's very effective on crabgrass and goose-

always fit your schedule.

That's the time for Balan* herbicide.

Available straight and on fertilizer, it gives you up to ten weeks of grassy weed control. And, depending on the rate you use, you can reseed as soon as six weeks after you apply it.

Used according to label directions, Gallery, Team and Balan are gentle on all major turfgrass species. University studies show they don't harm root systems. And they won't leach into groundwater or harm nearby ornamentals and trees.

s for people interested in

S.

Nothing controls weeds in turfgrass better than turfgrass itself. That's because thick, healthy turfgrass doesn't give weeds any room to grow.

from insects and disease, you'll need less insecticide and fungicide. All of which means Cutless

can reduce your overall chemical use. Cutless also reduces water use by up to 30 percent. Makes turfgrass more drought-

Why live with a few weeds to live with a few less chemicals

So, if you make your turfgrass thicker and healthier, you won't need as much herbicide.

One good way to do it is by adding Cutless® turf growth regulator to your maintenance program. Cutless makes turf thicker and more competitive by slowing its growth while encouraging more tillers and stolons. It also inhibits weed growth. This results in a gradual crowding out of weeds.

And because your thicker, healthier turf will be more resistant to damage

tolerant. Reduces mowing by about a third. Cuts clippings by about two thirds. And makes

greens faster and fairways more playable.

Plus, Cutless can help you gradually convert *Poa*

80 percent *Poa* on his fairways to 90 percent bentgrass over a five-year period.

There are many things you can do to grow thicker, healthier

germinating all season long. It can greatly reduce your use of post-emergence herbicides and hand-weeding in your ornamentals.

contains the same active ingredient as Surflan. Apply it in the spring, and you'll get a full season of broad-spectrum grassy weed

How To Make Your First Roundup Your Last Roundup.

Here's a way to make your first application of Roundup herbicide last all season. Mix 3 oz. of Surflan per 1000 square feet with $\frac{3}{4}$ oz. of Roundup per gallon of water and apply when weeds are less than 6" tall. Roundup will knock the weeds down, and Surflan will keep them from coming back for the rest of the season.

We have three different pre-emergence herbicides that make this possible. All of them are very gentle on your plants. And they bind tightly to soil particles, which makes them very resistant to leaching.

Our preemergence herbicides set up a gentle control zone that keeps weeds from germinating all season.

If you're looking for grassy weed control, you can use Surflan* preemergence herbicide. Surflan is, in fact, so gentle that you can spray it directly over the top of delicate ornamentals. Yet

control.

And for woody ornamentals, you can use Snapshot* herbicide. It controls

both grassy and broadleaf weeds. A single application lasts up to eight months. And it's available as a sprayable or in a granular form.

We can show you lots of ways to control weeds more safely and effectively. They're explained in

control insects and diseases.

For a free copy mail the coupon, or call our toll-free number.

Because you don't need a lot of herbicide to get beautiful results.

st beautiful thing about ned in the top 1" of soil.

You might think using less insecticide means you'll have to put up with more insects. But that's not necessarily the case. Because *how* you use your insecticide is as important as *how much* you use. With

the right tactics, you can use a lot less and still get excellent results.

Here's an example. Mixing insecticide with insecticidal soap can reduce the amount of insecticide you need on your ornamentals by

about 50 percent. Soap controls most soft-bodied insects and mites. By adding insecticide, you'll also take care of tougher insects, like scales and worms. University studies suggest you may get better control

A few ways to balance with your love for the env

Studies show that Dursban delivers better chinch bug control at lower rates than other insecticides.

than you get with insecticide alone.

Knowing exactly when to apply insecticide helps, too. One way to monitor mole crickets, chinch bugs, webworms and cutworms is by mixing 1½ oz. of dish soap in two

gives you so much control at such a low rate. Dursban also controls fire ants. It's available in water-soluble packets. And it can be bio-monitored, which can reduce the likelihood of over-exposure.

Once your hate for insects ironment.

gallons of water and sprinkling it on a four-foot area of turf. If eggs have hatched, this soapy mixture will flush insects to the surface, and you can apply insecticide

Now, we realize you probably have some questions. That's why we created The Turf Manager's Guide To Responsible Pest Management.

It's 44 pages packed with comprehensive information on the latest techniques for controlling insects, weeds and

turf diseases. For a free copy return the coupon, or call our toll-free telephone number. Because when you apply a little knowledge, you don't need to apply as much insecticide.

THE COMPLETE COMMERCIAL MOWING SYSTEM FROM "A" TO "Z"

Kubota has introduced a complete new mowing system, the FZ2100 Front Mower. From "A" – Auto Assist Differential (AAD) to "Z" – Zero Diameter Turning Radius (ZDT), it increases your power and mobility to handle all your mowing needs.

Equipped with 20 horsepower and four-wheel drive, the new FZ2100 Front Mower's zero diameter turning radius gives you the agility and power to get into the tightest spaces effectively. You can mow around trees, hedges, flower beds and other obstacles much more precisely and in less time. And, with the Auto Assist Differential drive system the machine automatically switches between 2WD and 4WD to match operating conditions and terrain, providing more traction and eliminating slippage. This increased productivity in all mowing conditions, and the FZ2100's ability to turn com-

Kubota's FZ2100 with Auto Assist Differential and Zero Diameter Turning Radius.

pletely around in one spot without damage to the turf, cuts way down the time spent on labor-intensive hand trimming jobs.

The FZ2100's front wheels rotate freely through your tightest turns, and Kubota

has designed round shoulder tires that virtually eliminate turf damage. And, the FZ2100 offers all the durability and innovation commercial operators have come to expect from Kubota. Like our powerful Kubota liquid-cooled diesel engine, hydrostatic transmission, 55 degree tilt deck for easy access and blade maintenance and optional grass catcher.

Your authorized Kubota dealer can show you the complete commercial mowing system with the power and maneuverability to handle your tough jobs from A to Z. For more information write to:

Flow Master Electronic Digital Flow Meters by Green Garde®

- No moving parts — assures trouble-free operation.
- Measure flow rates from .3 to 3 gpm or from 1.0 to 10 gpm.
- Measure volumes up to 10,000 gallons.
- Handles working pressure from 5 to 500 psi; burst pressure is 1,000 psi.
- High accuracy of $\pm 2\%$.
- Compact, lightweight, easy to use.
- Powered by long-lasting, field-replaceable 9-volt battery.

TURFCO EDGE-R-RITE MULTI-PURPOSE TURF EDGER

Just like a small sod cutter, the Blade does not spin, the oscillating motion does not throw debris.

Self-propelled and push models available.

Rugged design for commercial use.

Disc Blade

V-Blade

Optional Blades:

Disc Blade for cutting straight edge along sidewalks and driveways.

Right Angle Blade for golf course sand traps, and flower beds.

"V" Blade for removing a strip of turf along a sidewalk.

Right Angle Blade

DOES THIS PICTURE LOOK FAMILIAR?

BIOTURF NEWS

Will biologicals and organic turf products reshape the future of the green industry?

Let's just say one of the questions people have regarding the turf industry is "What's the future?" The answer is simple: "It's going to be a lot different than it is now." The turf industry is facing a lot of challenges, and the only way to survive is by embracing change. Biologicals and organic turf products are the key to a sustainable future for the green industry.

IF IT DOESN'T

it will soon. Look for your free copy of BIOTURF NEWS in the October issue of LM or call Publisher Jon Miducki for more information at 1 (216) 826-2855 or 1 (800) 225-4569.

Because every
drop counts.

RAIN BIRD.

The power structure at Honda.

At Honda, we believe power is good. But more power is better. And our multi-purpose engines are no exception. They offer you all the power you want. And they're designed to perform a multitude of tasks. Flawlessly. So if you need an engine, look to the organization that offers you more power: Honda. For your nearest dealer call 1-800-426-7701.

© 1991 American Honda Motor Co., Inc. For optimum performance and safety, please read the owner's manual before operating your Honda Power Equipment.

**Celebrating
Our
30th
Anniversary**
*and we're awarding a
cruise-a-month to celebrate*

Since 1963, California Landscape Lighting has been a leading force in the outdoor lighting field.

As we approach our third decade, we're stronger than ever. To celebrate, we've planned a big year, beginning with our "Lucky 6 Sailing" contest. Each month, until the end of 1992, we're giving away a cruise-for-2 to the Bahamas. A new contest will begin each month. Find out how you could win, by choosing the nation's leading distributor of landscape lighting for all your lighting needs.

WALKER DOES TOP LEVEL WORK ON THE ROOF

When Atlanta based landscape contractor, **Scapes Landscape Management**, wanted to improve efficiency in mowing the award winning Northpark Town Center Rooftop Park, they found Walker fit the job. Steven Coffey, owner of Scapes, told us:

We were surprised to find the Walker gave a better quality cutting job on the Zoysia turf grass than the walk behind reel mower we had been using. In fact, the building management asked us to continue using the "new" mower on their project after the first week we used Walker. Best of all, while improving quality, we cut our job time with the efficiency of the Walker rider. And Walker fits the job because it was compact enough to fit in the service elevator to ride to the third floor park.

We invite you to discover Walker quality and efficiency on your top level work.

GRASSHOPPERABILITY!

grass'hop'per abil'i ty n.
the ability to make all the right
moves for mowing quality and time-
saving productivity.

Make the move for productivity and durability with Grasshopper. Choose from the most complete line of outfront, zero-radius mowers in the industry, ranging from 11 to 25 hp, and from 35" to 72" cutting widths. Plus a full range of year-round attachments including the Quik-D-Tatch Vac® Grasscatching System. Discover Grasshopper comfortability and ease of operation with adjustable dual-lever control and low profile balanced design. Advanced dual-hydrostatic direct drives assure smooth response, require less maintenance and extend service life. Built-in durability saves downtime and gives dependable service season after season.

Zero-radius maneuverability

Outfront reachability and "no shift" reversability

Square corner turnability

Uncanny trimability

LAWN CARE PROS

Get on the Fast Track to Success!

The Professional Lawn Care Association of America

presents

"RACE WITH THE BEST"

THE 13th ANNUAL CONFERENCE

Nov. 16-19, 1992

Indiana Convention Center

Indianapolis, Indiana

*You'll gain the competitive edge,
stay informed, and have fun!*

Seminar "Hot Topics" Include:

- New Technology for Old Problems
- Business Concerns: Taxes, Estimating, Diversifying, etc.
- Organic Programs
- Risk Communication
- Marketing Tips
- Maintenance & Mowing

Plus:

- Recertification Track
- Round Table Discussions
- "Shop" the Green Industry Expo/92, Nov. 16-18, and the Giant Outdoor Equipment Demo Nov. 19.

**PROFESSIONAL TREE
SUPPORT SYSTEMS WITH
DUCKBILL®
Earth Anchors**

**No rework.
Guaranteed!**

You plant a lot of trees in a year. So why mess around with twine, rope, burlap and wooden stakes?

DUCKBILL® DTS Kits contain 3 pre-assembled galvanized steel guy lines, turnbuckles, protective tree collars and anchors for professional, safe, quick and easy installation. Your crews can support new plantings in only a few minutes each—with a systems that's stronger, safer and looks better than staking.

VERBODEN

You'll Never See What Makes Stihl Trimmers More Reliable.

People are surprised that we don't allow visitors at the Stihl trimmer testing lab in Germany. Sorry, but that isn't likely to change.

Because we put trimmers like the FS 74 and FS 76 through tests so secret that we don't even allow most Stihl employees in the building. Then, when they've passed muster in the lab, we send them to

professional landscapers in the roughest parts of the world for more abuse. Then back to the lab to see what else we can improve.

So we don't offer tours. Because our trimmer testing lab is more than just a secret facility. It's the secret to our success.

STIHL®

For the part of you that promised you'd never compromise.

For more information on Stihl trimmers, call 1-800-43-STIHL.

"Any Rancher Who Whines About Stringing Fence Ought To Try A Few Miles Of 115 Kv Powerline."

© 1992 Polaris Industries, L.P.

The job called for heavy work at elevations that could bust your lungs, over terrain that could break a truck's back. Then going in again to erase any sign you'd been there. No sweat.

**"TRUCKS CAN'T
MAKE IT, OR
AREN'T ALLOWED."**

"We went up on Polaris machines and opened a path for the power company," says Larry Johnson of Triple-L construction. "They hand-dug holes, placed poles by helicopter, strung powerline as thick as your wrist and pulled out. Rough work."

Even so, the work was far from over.

"We went back up and pulled the deadwood, re-planted, and erased the trail. If you see those poles at all, you'll think they grew there."

To a company born and bred in Colorado high country, that part of the job is all-important. And without a Polaris handy, all but impossible. "Before, you couldn't get up there but

on horseback or on foot," foreman Mike Williams says. "A Polaris gets you in, hauls your gear, does the job, gets you out. Good machines."

Like every Polaris, Mike's machines have automatic transmission, full floorboards and one-hand braking. Now he's looking into a new Polaris Big Boss: all-terrain vehicles with 850-pound tiltbed, load rack and tow hitch, six-wheel stability, and four-wheel or six-wheel drive. Handy features whether you're clearing brush at 12,000 feet or hauling equipment around a jobsite.

So what advice would Triple-L Construction offer other companies in need of strong, dependable help?

"Get Polaris. Period. Once you've got one, you won't do without it."

**RIDE THEM
AS CAREFULLY AS
WE MAKE THEM.**

Warning: ATVs can be hazardous to operate. Never carry passengers. Be especially careful on difficult terrain. Never ride on paved or public roads. Always wear a helmet and protective clothing. Polaris ATVs may not be ridden by anyone under 18. We recommend all riders take a training course. For information, see your dealer or call Polaris at 1-800-342-3764.

POLARIS
Believe It.

1225 Hwy 169 North, Minneapolis, MN 55441 (612) 542-0500.

Hi-Lift BAC-VAC hydraulically raises 54" to empty into pickup or trailer

Rugged welded steel frame construction

Several seat options let you choose your comfort level

Safety stop locks hopper in raised position for service

Compact hopper design does not limit visibility or maneuverability

Easy access battery compartment

Hopper design directs exhaust dust out the back, away from the operator

High flotation tires — your choice of turf or bar tread — minimizes compaction

Quickly change cutting height — no tools required!

Dual Path hydrostatic drive

Pop up indicator signals full hopper

Convert to a high-capacity blower with a single lever

Premium tire sealant in all tires — prevents flats from punctures

Counter-rotating high-lift blades give you extra vacuuming power

Air Flow™ deck draws leaves and debris underneath for a clean finish

Clean cut

The proficient Hustler Hi-Lift BAC-VAC™

Vacuum clippings and debris quickly and efficiently with no loss of maneuverability. You get a high quality, professional finish every time!

Trim Steer™ control gives you total command of speed, forward and reverse, and braking all in a single T-bar handle

BAC-VAC hopper holds 15 bushels of grass and leaves

Four engine options from 21.5 to 54 horsepower in diesel or gas models

Large capacity 11 gallon fuel tank

True zero radius turning is still possible even with Hi-Lift BAC-VAC

Ground speeds to 10 mph — get the done job fast

Signs That The New Cushman® Turf Master Has Arrived.

Electric controller is standard instead of hand valves.

Tank design leaves less than 1/2 gallon of unuseable material.

All pressurized chemical hoses are isolated for greater operator protection.

Exclusive ground speed governor control.

Unique boom design delivers more consistent nozzle pressure.

Unmatched three-wheel maneuverability.

Large tires for minimum ground pressure.

Anything Else will Sell You Short.

Compare feature after standard feature, and you'll arrive at one conclusion: the Cushman Turf Master is easier to calibrate, easier to operate, and the most accurate.

Compare the Vehicle.

No competitor provides the absolute ground speed control that's critical for precise spraying. You get

it — and a lot more — only from the Cushman Turf-Truckster™ vehicle.

Compare the Sprayer.

The latest from SDI features a new generation Hypro polypropylene pump, mechanical and bypass agitation, 15' or 20' booms, three pressure gauges — only a few of the many features the competition doesn't offer.

Compare the Facts for Yourself.

Call toll free 1-800-228-4444 for a free comparison brochure, or contact your Cushman dealer for a demonstration. You'll see that the Cushman Turf Master is far and away your best buy.

3. Control Products

This section is broken down by chemical product with companies providing that chemical listed below. Products common name (in parentheses) and brand names are listed on the line following the company name.

Absorbefacient (Aquatic)

Aquashade Inc
(acid blue 9, acid yellow 23) Aquashade
LESCO Inc
(elemental copper) Lescocide Plus
UAP Special Products Inc

Adjuvant/Carrier

Aabaco Industries Inc
(pyro-phosphatic surfactant-emulsifier blends) Luma-Plus
Arborchem Products Co
(nonionic surfactants & crop oil) Clean Cut; (nonionic surfactant, aquatic) Arborchem
Becker-Underwood Inc
Tank Cleaner WSP
Helena Chemical Co
(100% active non-ionic surfactant) Kinetic
Humate Intl Inc
(humic acid) Humate
ISK Biotech
(fatty amine ethoxylate) Frigate
LESCO Inc
Lesco Spreader Sticker; Lesco-Wet; Lesco Wet Granular; Lesco-Wet Tablets; Accu-Wet
Loveland Industries Inc
TurfWetter LI-700; Activator 90; Silwet L-77; Bond; Plyac; Unite
Nature's Touch
(polyflavonoid & plant extracts) Nutri Aid
Nouvelle Laboratories Inc
(organo-siloxane) Venom; (humic acids) Roundup Surfactant
Parkway Research Corp
(nonionic surfactants) Wet Foot
PBI/Gordon Corp
(paraffin base petroleum oil) Adjumec; (polymerized pinene, saturated naphthenes & paraffins) Exhalt 800

Algaecide

Aquashade Inc
(acid blue 9, acid yellow 23) AQUASHADE
Great Lakes Biochemical Co
(chelated copper liquid) Algimycin PLL-C; (chelated copper tablet) Slow Release Algimycin PLL-C; (wettable powder) Algimycin GLB-XII
LESCO Inc
(elemental copper) Lescocide Plus
Mycogen Corp
(fatty acids) DeMoss
Parkway Research Corp
(quaternary amine) Consan Triple Action 20
Turf & Nursery Supply Inc
UAP Special Products Inc
United Horticultural Supply
Whitmire Research Labs Inc
(n-alkyl, dimethyl benzyl, ammonium chloride) PT2000 Green-Shield

Antitranspirant

Aquatrols Corp of America Inc
(paraffin wax emulsion) FoliCote
Bonide Products Inc
(acrylic polymer resins) Bonide Rabbit & Deer Repellent; Mycogen Forever Green
Cleary Chemical Corp
(acrylic polymer) Clearspray
Easy Gardener Inc
Cloud Cover; Plant Saver; Shrub Saver
Green Pro Services
(pine tar & polymer) Vita Coat

Bactericide

J J Mauget Co
(streptomycin) Inject-A-Mycin "S"
Parkway Research Corp
(quaternary amine) Consan Triple Action 20
United Horticultural Supply

Biological Control

Bio Plus Mfg Inc
(vital liquid 10-4-3 lawn fertilizer with micronutrients)
Bio Plus

Bonide Products Inc
(bacillus thuringiensis liquid, powder, dust) Bonide;
(BT Kurstaki, BT San Diego) Mycogen MVP, M-One
Ciba-Geigy Corp
(steirnerma carpocapsae nematode) Exhibit
Cleary Chemical Corp
(BTI) Mosquito Dunks
Gustafson Inc
(bacillus subtilis) Quantum-4000
Karsten Turf Inc
(natural products - enzymes, humates, alga, etc)
Turf Anser Products
KLM Bio Systems Inc
Bio Groundskeeper; Bio Groundskeeper
LESCO Inc
Professional Soil Bioinoculant
PBI/Gordon Corp
(bacillus thuringiensis varikurstaki) Bactospeine
Rockland Corp
(bt) Foray
Sandoz Agro Inc
Pentac Aquaflo
UAP Special Products Inc
Dipel; Safer
United Horticultural Supply

Bio Products

Amereq Inc
(humic acids) Energizer
Arbor Grove Inc
(cytokinin, auxin-like compounds) Kelpak
Burlington Scientific Corp
Speed Feed Elixir; Speed Feed Turfgrass Formula
Clifford Sales & Marketing
(cytokinin) Cyto-Gro; (cytokinin, iron) Cyto-Fe
Emerald Isle Ltd
(liquified sea plant extract) PanaSea Plus
Green Pro Services
(microbes) Vita Krobe
Gro-Power Inc
Gro-Power
Harmony Products
(poultry manure fertilizer with bio activators for thatch reduction) Harmony 3-63; (poultry manure fertilizer with bio activators for thatch reduction) Harmony 14-3-6 Plus
LESCO Inc
Professional Soil Bioinoculant
Soil Technologies Corp
(ascophyllum nodosum) Sea-Green Seaplant Extract
Turf & Nursery Supply Inc
United Horticultural Supply

Colorant

Aabaco Industries Inc
(blue pigment dye) Luma-Trac
Arborchem Products Co
(blue spray pattern indicator) Bulls Eye; (blue water soluble packet) Hi-Light WSP
Becker-Underwood Inc
Turf Mark; Green Lawnger; Mulch Magic
Cleary Chemical Corp
Greenzit
Finn Corp
Green Plus
Grace-Sierra Horticultural Products Co
Vitalon; Auragreen
Green Graphics
(latex-based, modified) Green Graphics Green
Permanent Turf Colorant
Jonathan Green Inc
(spray colorant) Jonathan Green Blue
LESCO Inc
Lesco-Nu-Mulch; Lesco Green; Lesco Tracker; Lesco Lake & Pond Colorant
Milliken Chemical
(polymeric colorant) Blazon
Parkway Research Corp
(polymeric colorant) Big Foot
PBI/Gordon Corp
(colorant) Gordon's Spray Colorant

Looks like
it's time
for new
homogeneous
Greenskeeper
12-25-12.

Designed specifically for late fall and early winter applications, Greenskeeper 12-25-12 will build stronger root systems and deliver faster green-up in the spring. And for a few cents more than blends, you'll get exceptional coverage and Greenskeeper homogeneous quality in a 1-2-1 ratio. For more information about Greenskeeper's newest granular fall fertilizer, contact your Lebanon sales representative or local Lebanon Turf Products distributor. Or simply call 1-800-233-0628.

Greenskeeper is a product of Lebanon
Chemical Corporation.

SUMMER PATCH CONTROL OFFER

P.O. Box 4913

Kansas City, MO 64120-0013

Experts recommend combining a proven fungicide with smart cultural practices to create a summer patch prevention program.

If you think that's sound advice, then call for our free audio tape and brochure.

Each outlines a summer patch program that includes everything from identifying the causes to managing susceptible areas.

Also, they tell you a little bit about BAYLETON 25 Turf and Ornamental Fungicide. For ten years, you've seen what it can do for dollar spot and many other diseases. Now discover how well it performs in a summer patch program.

For your free tape and brochure, call 1-800-842-8020. Or write Miles Inc., Specialty Products, Box 4913, Kansas City, MO 64120.

After all, summer patch control today requires that you use your head. And what better place to start than with your ears.

Ask for Gustafson Apron[®] before you seed

UNTREATED

TREATED WITH APRON

or you may wish you had later

**Start your turf right.
Plant seed treated with quality Gustafson
seed treatments.**

Gustafson, the worldwide leader in seed treatment technology, offers a variety of Apron fungicide formulations to help your turf start fast and healthy.

Gustafson Apron protects against *Pythium* damping-off and seedling blight during the critical first weeks of the growing season. The early season plant health you get with Gustafson Apron helps produce an improved root system, better emergence and more plants per square foot.

You'll see turf emerge faster, thicker and greener, and look good all season long. That's a lot of benefits for just a few pennies per pound of seed.

Apron can be used when you're seeding new turf, re-seeding or over-seeding. And it's effective on ALL types of turf and forage grasses.

Ask your chemical supply dealer for Gustafson Apron, including Apron-FL, Apron 25W and Apron Dry for hopper box application.

Gustafson 

P.O. Box 660065 Dallas, Texas 75266-0065 (214) 985-8877

Always read and follow label directions.

Gustafson (logo) is a Reg.TM of Gustafson, Inc. Apron is a Reg.TM of Ciba-Geigy.

We were going to tell you lower-priced Roundup® gets more done for less.

But our customers said it better.

During a recent survey, we asked our customers for new ways they could use the time- and cost-savings of lower-priced Roundup® herbicide. After 2,361 responses like these, we realized we couldn't say it better.

"Best product since the shovel. Creates a clean landscape and makes my good job look better."

- **Orin Tidyman**, Supervisor
T & S Services, Germantown, WI

"We are going to expand a city-wide program to control vegetation growth on 75 miles of streets and sidewalks with Roundup."

- **H. Layton Paul**, Public Works Director
Thomasville, NC

"After treating with Roundup one time, I eliminate the use of a weedeater all season."

- **James Rhoden**, Superintendent,
Deerfield Country Club, Weston, WV

"It eliminates trimming totally. No more hand weeding. Thanks."

- **John A. Lucas**
President, Lakes Region
Landscaping, Inc.
Laconia, NH

"My lawn mowing crews carry Roundup pre-mixed in a spray bottle, so they can treat grass and weeds in crack-n-crevice."

- **Mark Davis**, Owner, AAA
Yard Care, Spokane, WA

"We just did a job for the airport and I didn't have to go back to see if it worked. Roundup always does."

- **Patricia Ann McCurry**
Owner, The Lawn Dr
Lawton, OK

"I really appreciate the lower cost of Roundup because it helps me hold the line on my contract jobs."

- **Rusty Holt**, Owner, Property
Management Services, Greensboro, NC

"We use Roundup to trim around trees and prevent damage from line trimmers. This saves labor and money, not to mention trees."

- **Slade Strickland**, Director of Parks Recreation and
Landscape Development, Addison, TX

ORTHENE® will keep unwanted pests off your turf.

Trying to control a broad range of tough turf pests like mole crickets, fire-ants, fleas, chinch bugs and the worm complex is no day at the beach. That's why you should use ORTHENE®.

ORTHENE kills both on contact and with long-lasting systemic action, and

can be applied to lawns, ornamentals, shrubs, even trees. You can also combine ORTHENE with many miticides and fungicides for more effective pest and disease control with just one application.

ORTHENE is waterproof within 24 hours, and its chemical structure allows it to break down quickly, eliminating the threat of harmful buildup in the soil.

Throw a party your toughest turf pests will never recover from, with ORTHENE Turf, Tree and Ornamental Spray.

ORTHENE® Turf, Tree & Ornamental Spray

OFTANOL USERS KNOW THE BEST WAY TO OUTSMART GRUBS IS WITH A LITTLE EXTRA HOMEWORK.

Getting rid of grubs that attack your customers' lawns can be pretty tricky sometimes. Unfortunately, simply treating against these destructive pests doesn't always guarantee success.

But many lawn care operators have learned that all it takes to outsmart grubs is a little preparation—finding the right product and the right time of year to make the application. The product is OFTANOL Insecticide. Studies show that time after time, OFTANOL provides grub control. And delivers better control than other widely used products such as Sevin® and Diazinon Insecticides.

The right time to apply it? That will vary from region to region. But a good rule of thumb is

to treat with OFTANOL when grubs are at or near the surface. An easy way to check is by just pulling back a bit of sod and looking for an infestation. Or call your local Extension office to determine peak periods of grub feeding in your area.

These are, of course, just the basics of effective grub control. If you'd like to learn more about OFTANOL and its proper usage, contact your local Miles representative. Or just give us a call at (800) 842-8020. One of our trained professionals will be standing by to answer your questions. Miles Inc., Specialty Products, Box 4913, Kansas City, MO 64120.

So why let grubs continue to test your patience when the easy answer is OFTANOL.

Sevin is a Reg. TM of Rhone-Poulenc Ag Company

Now, landscapers everywhere can be good in beds.

Introducing PENDULUM™ from American Cyanamid, the preemergent for outstanding over-the-top weed control at an unbeatable price.

It doesn't take much effort, time, or expense to be good in beds these days. Not when you have a little help from new PENDULUM™ WDG herbicide.

PENDULUM is a preemergent herbicide that gives you excellent weed control—without the weeding. It's highly effective against most annual grasses and many broadleaf weeds, controlling them as they germinate. Before they become a problem.

At the same time, new PENDULUM is gentle on your bedding plants. Just spray it over-the-top of established trees, shrubs, even sensitive flowers and ground covers.

Its active ingredient, pendimethalin, can be applied safely to labeled ornamentals for proven performance and consistent results.

And, because PENDULUM costs less per treatment than Surflan¹ and other preemergents, you get highly cost-effective control all season long.

This season, try new PENDULUM, for over-the-top weed control that will make you good in beds.

Use the Turf Care® Pros for any number of growing problems. 104 to be exact.

Professionals count on the Turf Care Pros. To treat diseases, Daconil 2787® is the cornerstone of your management program. The broadest-spectrum fungicide on the market, it controls 12 major turf and the major ornamental diseases. And there's never been a documented case of disease resistance to Daconil 2787.

For pre- and postemergent herbicide control of annual grasses and broadleaf weeds, it's Dacthal® and Daconate 6.* On pesky broadleaf weeds, use 2 Plus 2.

And round out your program using Frigate® with Roundup* to control perennial and annual weeds. Together with Daconil, they all create a complete professional management program.

When it comes to turf and ornamental care, count on the Turf Care Pros. And count out diseases and weeds — 104 to be exact.

Always follow label directions carefully when using turf chemicals.
*Roundup is a registered trademark of Monsanto Company.

ISK Biotech Corporation, Turf & Specialty Products Division, 5966 Heisley Road, P.O. Box 8000, Mentor, OH 44061-8000.

When Hardiness, Improved Drought Tolerance and Disease Resistance are The Questions, The Solution is...

SunDevil, *New* From Medalist America.

If you're tired of worrying about how the weather's going to affect your turfgrass, listen to this: SunDevil from Medalist America offers improved cold tolerance and disease resistance while requiring less water and expensive maintenance to maintain a dense, dark green, uniform bermudagrass turf. SunDevil greens up earlier and goes dormant later in the fall than common bermudagrass. And, SunDevil is easy to establish because it's seeded instead of planted in plugs. It's ideal for applications that require hardiness, durability, thickness and tolerance to a variety of weather conditions.

Choose SunDevil for lawns, parks, golf course fairways and tees, cemeteries or when overseeding existing stands of common bermudagrass to upgrade turf. It's an advanced generation bermudagrass that offers you the perfect solution in areas where bermudagrass is winter killed and cool season grasses exhibit disease problems. If you want a seeded bermudagrass that's lower growing and offers quality and uniformity of sod for less, you've found the answer in SunDevil from Medalist America.

Find out how SunDevil from Medalist America can save you time, effort and money! Contact your Medalist representative today, 1-800-568-TURF.

Locations in Minneapolis, MN, Albany, OR, Downers Grove, IL, New Brunswick, NJ.

POLLUTION CLEAN-UP INSURANCE FOR COMMERCIAL LAWN CARE FLEETS AND EQUIPMENT

*Through the National Lawn Care Risk Purchasing
Group, Inc., Lawn Care firms can now purchase
pollution clean-up insurance for spills which are the
result of an automobile accident.*

*Reasonably priced clean-up insurance is available
for all sizes of trucks and production equipment
providing up to \$100,000. in
annual clean-up costs.*

*Coverage is provided by Lloyd's of London and is
subject to a \$2,500. deductible per accident. This
program will not replace your automobile insurance—it
will fill a void in your current policy. Consult your
Agent or Broker to verify that your current policy does
not provide pollution clean-up protection.*

OREGON-GROWN RYEGRASS

For quality turf all winter long

Ryegrass is the all-around answer to excellent winter turf all over the South.

You can count on it to germinate in a matter of 7-10 days or even less under ideal conditions.

It's the ideal choice for any budget because Ryegrass is available as annual or perennial.

Oregon-grown annual and Gulf annual are considered the workhorses of overseeding and have long been used to produce handsome turf at minimum cost. Annual tolerates mowing heights from $\frac{3}{8}$ to $1\frac{1}{2}$ inches and is handsome enough for putting greens at some of the South's better golf clubs.

Thoroughbreds of the Ryegrass family are the fine-bladed turf-type perennial varieties which produce a "show quality" turf. Vigorous as well as handsome, they can be mowed at heights similar to that of annual.

Perennial performs like an annual in the South and fades on arrival of summer.

Always in good supply, Ryegrass is cold tolerant and retains its color during the chill of winter. It responds rapidly to fertilization and quickly develops a strong root system.

For more information and free brochures see your seed dealer or write:

A UNIFIED INDUSTRY WORKING TOWARD A COMMON GOAL

Nearly every key issue affecting one part of the Specialty Pesticide Industry affects the entire industry.

RISE (Responsible Industry for a Sound Environment) is bringing industry leaders together to identify critical public issues and legislation, and address them as a unified body.

We're proud of our industry's commitment to enhancing and preserving the environment. And we're committed to educating policymakers and the public about the environmental, health and safety benefits of proper pesticide use.

A wide variety of companies and organizations are already members of RISE, and have contributed to successes like we enjoyed recently in

Missoula, Montana, which demonstrates the industry is able to work constructively with local government bodies.

If you're a manufacturer, formulator, distributor, supplier or association involved with the use of specialty pesticides, we invite you to join RISE and participate in our future successes.

For more information, call RISE at
(202) 872-3860, or write to 1155 15th St. N.W.,
Suite 900, Washington, D.C. 20005.

GREEN INDUSTRY SHOWCASE

New compost bin designed to make backyard recycling easy, affordable

A compost bin that you recycle.

That's what Jay and Terrell Menefee have in "The Groundskeeper."

The father and son team also believe the bin will make composting easier for homeowners, municipalities and professional landscapers, the three main players in the composting/landfill scenario.

Yard waste is already banned from landfills in some states, with others soon to be passing similar legislation. At Ohio landfills, for example, yard waste bans go into effect in December of 1993. California's recent AB939 legislation required each city and county to divert 25 percent of all landfill material by 1995, and 50 percent by 2000.

Landscape management professionals are therefore concerned, and want to find ways to deal with the problem in such a way that they keep their customers happy, yet are not themselves totally responsible for disposing of customer yard waste. Because no matter how much the industry explains the nutritional benefits of leaving the clipping, there's always going to be certain customers who want the clippings removed.

The Menefee's are marketing "The Groundskeeper" through their company, Delvin & Taylor of Novelty, Ohio. They now offer the bin at a volume discount to municipalities and professional landscapers across the country.

Early on, the Menefees believed their approach to composting should have low impact on the environments, be affordable, require little homeowner effort and not detract for the appearance of the customer's yard. After three years of laboratory and field testing, they believed they met, and, in some ways, exceeded their objectives.

"The Groundskeeper" is a biodegradable bin made of recycled paperboard, containing 15 percent post-consumer fiber. A water-soluble, biodegradable ink is used to dye the bin, which measures 34.5 inches across and 32 inches high.

The company says the bin has a 150-gallon capacity, and will hold about five commercial lawn refuse bags of material.

Homeowner instruction in establishing backyard composting is virtually unnecessary, considering how easy the procedure is. Grass clippings, leaves and other yard waste is layered into the bin. Occasional stirring assists in the breakdown, but is not required.

Delvin & Taylor says the composting process takes about six months.

The company is now supplying bins in bulk quantities at a cost of about \$5.50 per bin.

During their early research, beginning in 1989, the Menefees tried several approaches, using a variety of biodegradable refuse bags, tested with and without inoculators and accelerators, added to aid the composting process.

Their research revealed that the best composting bin prototypes were those made with a paperboard containing the right combination of compressive stress resistance and water vapor transmission rate characteristics.

A compressive stress resistance was found that kept the bin rigid as the materials inside were being compressed and composted, as opposed to those the two-ply paper lawn refuse bags which form multiple accordion folds and collapse along with the materials.

As a solution, a water vapor transmission rate was found that tended to keep the materials inside the bin above the 50 percent moisture level required for composting, but also allowed the bin to rapidly dry out after soaking to below the 20 percent moisture content.

According to the company, paper kept at or below 20 percent moisture content

'The Groundskeeper' compost bin is biodegradable.

decays very slowly, and as a result, the bin maintains its structural integrity over the year or two during which a homeowner would be using it.

The Menefees suggest that one bin be used in the fall to collect and store leaves, and a fresh bin be set up in spring for grass clippings. The partially composted leaves would then provide a source of carbon to layer into the grass clippings over the growing season.

An introductory package sells for \$395, and includes:

- 70 compost bins
- 70 instruction books
- 70 promotional brochures
- 5 study packages.

The composting "Pilot Program" package sells for \$765, and includes 140 bins, books and brochures, and 10 study packages.

One case of bins sells for \$195.

SHOWCASE PRODUCT REVIEW

Landscaping software for small, medium size company

Eagle Software announces the release of The Landscaper software for IBM and compatible computers, designed especially for small and medium-sized companies.

Version 1.1 features Customer and Equipment Tracking, Proposal Writing, Invoicing, Accounts Payable and receivable and Memowriter.

The Landscaper also handles snowplowing, dump runs and more. The Landscaper requires a hard drive and EGA or VGA monitor, and a 286, 386 or 486 computer.

Water management system can handle up to 16 stations

Solatrol, Inc. has introduced its LEIT 8000 Series II Water Management Computer.

The LEIT 8000 can accommodate twice the number of valve stations of its previous model without reliance on AC power, batteries or bulky, awkward solar panels.

Solatrol says the LEIT 8000 is compatible with most brands, sizes and styles of valves.

The controller can accommodate either eight or 16 stations. The capacity of the basic eight-station unit is doubled simply by attaching Solatrol's Expander Module Kit (XKIT 8830), similar in nature to a signal splitter used to multiply the number of cable TV outlets in a home.

"In this way, we can more efficiently and economically tailor the LEIT 8000 system to suit the specific needs of the end-user," says Wyn Nielsen, president and CEO of Solatrol, Inc.

According to Solatrol, the LEIT 8000 is completely independent of AC power, batteries or vulnerable solar panels.

The exclusive microelectronics system collects ambient light energy and stores it directly within its circuitry, assuring operation day and night.

Nielsen says the design makes the system virtually immune to lightning.

TO ECONOMICALLY DISPOSE OF:

TREES & BRUSH

MODEL 250

BRUSH & PRUNINGS

MIGHTY BANDIT II

For Trees and Brush

Select one of Bandit's horizontal feed, disc style chippers -- 6", 9" and 12" diameter capacity machines are offered. See firsthand how quickly and effortlessly these machines turn tree waste into dimensional, recyclable wood chips.

For Shrubbery, Prunings and Brush

The Mighty Bandit II is the answer. This all purpose chipper combines a 2-wheel hydraulic feed system with gravity. Chip prunings, brush, vines, even paper and cardboard. The Mighty II produces a fine chip that is ideal for compost.

Video tapes are available upon request

Isn't it time that you tried the most popular chipper in the tree care industry?

PRODUCT REVIEW

Radio system keeps golf carts out of protected areas

The Cartrol golf cart control system uses radio signals to keep golf carts away from areas they don't belong; eliminates signs, ropes, fences, and other barriers; and results in less mowing time.

A thin wire is buried six to eight inches deep in designated force field configurations. A radio signal is sent from a transmitter through the wire, creating a protected force field. When a cart enters the force field, a control box on the cart activates an audio warning and an indicator light, and forward gear is interrupted. Only the reverse gear is operational until the cart exits the protected area.

Control boxes cost \$225 per cart. Installation and components per green or other area is between \$1500 to \$2000. A design fee of \$600 depends on whether the course has blueprints/ aerial photographs.

New fertilizer coating ends nutrient release guesswork

O.M. Scott & Sons Company's new Poly-S fertilizer coating technology has been applied to the company's 21-3-20 NPK Turf Fertilizer.

NPK Turf Fertilizer is designed for more uniform turf growth and extended residual. Its one-to-one, nitrogen-to-potash ratio provides excellent initial green-up without surge growth.

"We're proud to offer superintendents and turf managers NPK Turf Fertilizer," says Richard B. Stahl, vice president and general manager of Scotts Professional Business Group. "Utilizing our state-of-the-art Poly-S technology, which provides polymer performance at SCU (sulfur-coated urea) prices, it is an excellent value."

The product supplies sufficient potash to build soil potassium levels and a maintenance rate of phosphorus and sulfur.

CORRECTIONS

■ The July issue of LM stated that Bill Pensyl is owner of Green Thumb Services in North Brunswick, N.J. However, Pensyl is actually operations manager for Green Thumb, which is owned by Joseph A. Bianco Sr. and Joseph A. Bianco Jr.

Also that month, in the article about deer tick control LM neglected to note that Dr. Brian Bret, who was cited, is with DowElanco.

We regret any inconvenience caused by these two oversights.

Make sure your equipment goes the whole nine yards.

Use Slick 50 Small Engine Formula. It gives mowers, trimmers, cutters and clippers the same kind of advanced PTFE treatment that protects your car's engine from wear. Your equipment runs longer, with fewer breakdowns. So you get to rake it in, instead of your repairman.

SLICK®
The Engine Wear Protector. 50

Excellent Dark Color: When compared to other tall fescues, Rebel Jr provides the deep, dark color preferred by turf professionals.

The darker color of Rebel Jr is apparent in these test plots comparing Rebel Jr to other tall fescues.

Less Clippings: The lower, slower growth rate of Rebel Jr results in easier mowing and 30% less clippings. However, it is proven to have an advantage over the current, much-talked-about "extreme dwarfs"; as Rebel Jr does not grow so slowly that the plant's rate of establishment, vigor, tolerance to traffic and stress, or recuperative qualities are affected. The moderately slow growth rate of Rebel Jr is a distinct advantage over that of the extreme dwarf varieties.

Rate of Establishment: While Rebel Jr displays moderately slow growth, its rate of establishment is faster than the extreme dwarf varieties such as Bonsai.

The dense, slower growth of Rebel Jr can be seen one week after mowing.

Top Performance with Less Maintenance: Rebel Jr from seed or sod is adaptable to full sun or moderate shade. It needs only low to medium maintenance and uses 25% less fertilizer than Kentucky bluegrass.

Rebel Jr will give excellent performance in sun or shade. It's ideal for use in hard-to-maintain areas such as golf course green banks, slopes and bunker faces.

Improved Drought Tolerance: A deep, extensive root system allows Rebel Jr to display excellent drought tolerance.
